GET **1 DRILL BODY**  
& **20 INSERTS**  
HURRY! PROMOTION RUNS FROM  
AUGUST 1, 2023 - MARCH 31, 2024

### TERMS AND CONDITIONS

- ▶ Orders need to be emailed or faxed Email: [orders-ct@mmus.com](mailto:orders-ct@mmus.com) or Fax: 800-643-4909
- ▶ Each select kit includes (1) drill body and ten (10) of each inner and outer inserts for selected drill body
- ▶ Specify kit EDP number onto separate purchase order and include promotional code: **PROMOMVX-US**
- ▶ Promotion includes standard MVX stock drills listed in the promotion flyer only and are available while supplies last
- ▶ All sales are final with no returns and no blanket orders
- ▶ Contact your local Mitsubishi Materials District Sales Manager for additional details
- ▶ Promotional products and promotional time period is subject to change without notice
- ▶ For additional information about Mitsubishi Materials products, please visit [diaedgetools.com](http://diaedgetools.com) or [mmus-carbide.com](http://mmus-carbide.com)
- ▶ Distributors, please place orders by emailing: [orders-ct@mmus.com](mailto:orders-ct@mmus.com) or Fax: 800-643-4909

For technical questions about our MVX products, please contact our Technical Service Department: **800-486-2341**

## INSERT SELECTION CRITERIA

The peripheral cutting speed is naturally slower towards the center of the drill and chip welding easily occurs. Below are some important information that will help to select the correct insert.

### ▶ STEELS AND CAST IRONS

The preferred breaker for steels and cast iron is the UM breaker. For the outer edge, use the CVD coated grade MC1020 for steel applications and the MC5020 grade for cast irons. For the inner edge, the PVD coated grade VP15TF should be used. If fracturing occurs, VP15TF should be used for both positions to provide extra stability.

### ▶ STAINLESS STEELS

For the best performance, use the UM breaker in the peripheral edge and the US breaker in the inner edge. The selection of grade should be the same as used for steels.

### ▶ HARDENED STEELS AND PREVENTING FRACTURE

For the inner edge, UH is the ideal breaker. The high-strength, negative land edge, together with the durable PVD coated carbide grade DP8020, are suitable for machining hardened steels (45HRC or lower) and preventing fracture in steels and cast irons.

### ▶ ALUMINUM ALLOYS PROCESSING

For both the inner and outer edges, UN breakers are ideal. The polished finish and peripheral polishing prevent welding, and the combination of the positive lands and high rake angle further enhances the sharpness.

	1st Recommendation		When Outer Insert Fractures	
	Outer Insert	Inner Insert	Outer Insert	Inner Insert
<b>P</b> Mild Steels, Alloy Steels	MC1020  UM Breaker	VP15TF  UM Breaker	VP15TF  UM Breaker	VP15TF  UM Breaker
<b>M</b> Stainless Steels	MC1020  UM Breaker	VP15TF  US Breaker	VP15TF  UM Breaker	VP15TF  US Breaker
<b>K</b> Cast Irons	MC5020  UM Breaker	VP15TF  UM Breaker	VP15TF  UM Breaker	VP15TF  UM Breaker
<b>H</b> Hardened Steels	MC1020  UM Breaker	DP8020  UH Breaker	VP15TF  UM Breaker	DP8020  UH Breaker
<b>N</b> Aluminum Alloys	TF15  UN Breaker	TF15  UN Breaker		

\*\* Please note that all red text grades and breakers are not included in the promotion kits and can be purchased at additional cost. Promotional kits cannot be substituted or switched out for other breakers or grades.

## UM BREAKER FEATURES

For General Use, Medium and High Feed Rates

- ▶ The unique wave design allows smooth chip discharge
- ▶ An ideal universal breaker for steels, stainless steels, cast irons and hardened steels

## INSERT GRADES FEATURES

**MC1020** is a CVD coated grade for higher cutting speeds. The main properties are high wear and high plastic deformation resistance for reliability.

**MC5020** is a CVD coated grade suitable for drilling cast irons. It has excellent abrasion resistance and gives long tool life by controlling chipping and thermal cracking that can occur when drilling nodular cast irons.

**VP15TF** is a PVD coated grade suitable for a wide range of applications. The micro-grain substrate and Miracle coating provide excellent welding resistance.

## 4 CUTTING EDGES

- ▶ Economical 4-corner insert

## IDEAL COMBINATION OF OUTER CVD & INNER PVD INSERT

- ▶ A highly wear resistant CVD coated insert is used for the peripheral edge and a PVD coated insert is used for the inner position for extra stability

## UNIQUE CHIP BREAKER DESIGN

- ▶ For a wide range of workpiece materials and applications

## WIPER EDGE

- ▶ A wiper type geometry for the peripheral cutting edge achieves excellent wall accuracy

Universal UM Breaker

## HIGH RIGID BODY

- ▶ Increased surface hardness prevents abrasive damage caused by chip flow
- ▶ Optimum insert position controls deformation and vibration of the holder. This enabled a maximum drilling depth of L/D=6

**For Your Safety**

- Don't handle inserts and chips without gloves.
- Please machine within the recommended application range and exchange expired tools with new ones in advance of breakage.
- Please use safety covers and wear safety glasses.
- When using compounded cutting oils, please take fire precautions.
- When attaching inserts or spare parts, please use only the correct wrench or driver.
- When using rotating tools, please make a trial run to check run-out, vibration and abnormal sounds etc.
